CIA-Trained Police

Sift: Representative Edward I. Koch, of New York has expressed "outrage" over an admission by the CIA that it has helped train some policemen in wiretapping, handling explosives, and preparing intelligence reports.

In this day and age when serious crime is rampant and the subverters of Russia, China, and other communist countries are successfully fomenting labor, race, welfare, and other strife; when we have anarchists, revolutionists and communists causing riots and rebellion under the guise of anti-war activities; it would appear that the congressman should be happy that we have a well-trained agency like the CIA to help train local police in their strenuous, dangerous and important duties. Such training does not imply control nor does it imply that the CIA is pursuing its underground activities in the United States
